

Instrument Building Guide

Shaker

Place un-popped popcorn, uncooked beans, rice or grain between two similar sized DUPLO bricks (16, 8 or 4 stud) and tape together. Shake.

Tambourine

Place a 4-stud DUPLO brick inside a DUPLO door/window element. Secure it with two rubber bands. Shake.

Drum

Construct a square by laying four 8-stud DUPLO bricks next to each other at 90 degree angles, do not connect the bricks. Place four more 8-stud bricks on top. Continue this pattern until four layers of bricks are in place. Place a sheet of paper over the square. Place four 8-stud DUPLO bricks over the paper and push them onto the structure below, creating a barrier of paper in between.

Kazoo

Wrap a 16-stud DUPLO brick tightly with notebook paper (one layer) and secure on the ends with rubber bands. Play it like a kazoo, with mouth slightly open, hum along the long side of the brick.
